Does Science Need A Global

The scientific world is rapidly globalizing; anyone who is working in the sciences or who wants to go into science needs to understand this. It is globalizing because researchers everywhere recognize English as a lingua franca and use it as a shared medium.

Amazon.com: Does Science Need a Global Language?: English ...

A global tongue has helped modern science escape the borders of a small number of rich nations. Scientists in developing nations can now have access to the same knowledge as those in the West. The author thinks this is necessary so that the world can find solutions to large-scale problems like disease, clean water, food availability, and ...

Amazon.com: Customer reviews: Does Science Need a Global ...

In Does Science Need a Global Language?, Scott L. Montgomery seeks to answer this question by investigating the phenomenon of global English in science, how and why it came about, the forms in which it appears, what advantages and disadvantages it brings, and what its future might be. He also examines the consequences of a global tongue, considering especially emerging and developing nations, where research is still at a relatively early stage and English is not yet firmly established.

What is a Global Studies Major and is it Right for Me ...

National and international science academies and scientific societies have assessed current scientific opinion on global warming.These assessments are generally consistent with the conclusions of the Intergovernmental Panel on Climate Change.. Some scientific bodies have recommended specific policies to governments, and science can play a role in informing an effective response to climate change.

Scientific consensus on climate change - Wikipedia

Does Science Need God? Pierre-Simon Laplace (1749-1827) was a brilliantly talented scientist, mathematician, and astronomer. So talented, in fact, that he earned himself a nickname: The French Newton. Just like the 'original' Newton a century earlier, Laplace put together an entirely mathematical model of the solar system.

Does Science Need God? - bethinking.org

Q: You argue, ultimately, that science does need a global language. Why is this the case? A: A global language is needed for the future growth and advancement of science worldwide. It provides a single medium by which data, ideas, findings, news, and opportunities can be shared with the entire global research community, giving scientists in the developing world access (within the limits of their internet capacity, of course) to same the information researchers have in rich countries.
