Ignorance And Uncertainty Emerging Paradigms

We would like to show you a description here but the site won't allow us.

Action: SAGE Journals

Introduction Uncertainty is an inevitable part of healthcare and a source of confusion and challenge to decision-making. Several taxonomies of uncertainty have been developed, but mainly focus on decisions in clinical settings. Our goal was to develop a holistic model of uncertainty that can be applied to both clinical as well as public and global health scenarios. Methods We searched Medline ...

Developing an integrated multilevel model of uncertainty in health care ...

Secondary uncertainty, on the other hand, arises from a lack of communication across decision-making centers within an organization or a network. Direct sensing, such as opening lines of communication among divisions or partners, can reduce secondary uncertainty, as can vertical integration (Helfat & Teece, Reference Helfat and Teece 1987).
