InterQual® Behavioral Health Criteria support initial and continued stay level-of-care decisions across the behavioral health continuum of care. The criteria address the varying needs of geriatric, adult, adolescent, and child patients with both psychiatric and substance use disorders. The depth of criteria allows care managers to consider symptoms, functional status, and quality of support systems as determinants for the most appropriate level of care.

InterQual Level Of Care Criteria Handbook

When we receive a request for authorization or prior approval, our utilization review nurses use Change Healthcare's InterQual® criteria to determine if the services and level of care are clinically indicated. If the criteria are met, the case is approved; if the criteria are not met, the case is reviewed by a physician.

InterQual Criteria & SmartSheets

InterQual ® Level of Care. Level of Care Criteria assist organizations in assessing the clinical appropriateness of patients' admissions and continued stays across the continuum of care. By applying criteria, the reviewer can objectively evaluate whether the patient's specific presentation and prescribed services are appropriate for a given level of care.

Medical Necessity Criteria Chart

VA uses a nationally-recognized set of
criteria called InterQual as its guideline
to determine if the time Veterans spend
at VA hospitals is appropriate for their
diagnoses and treatments, and to
provide a "care path" to help care teams
decide appropriate next treatment
steps.
