### Ubuntu Help Guide

11. Don't forget to Update! It's always good practice to ensure your system is up to date, especially after a fresh install. The easiest way to do this is via the Software Updater app. Search for Software Updater via the app menu (the icon with 9 squares in the bottom corner of your window) and it will check for updates and apply them.. You can also update Ubuntu using the terminal.

### Install Ubuntu desktop | Ubuntu

4. Select the Ubuntu ISO file. To select the Ubuntu ISO file you downloaded previously, click the SELECT to the right of "Boot selection". If this is the only ISO file present in the Downloads folder you will only see one file listed. Select the appropriate ISO file and click on Open.

### Create a bootable USB stick with Rufus on Windows | Ubuntu

Boot-Repair is a simple tool to repair frequent boot issues you may encounter in Ubuntu like when you can't boot Ubuntu after installing Windows or another Linux distribution, or when you can't boot Windows after installing Ubuntu, or when GRUB is not displayed anymore, some upgrade breaks GRUB, etc. . Boot-Repair lets you fix these issues with a simple click, which (generally reinstalls GRUB ...

DNS and DHCP Guests. libvirt uses dnsmasq to hand out IP addresses to guests that are configured to use dhcp. If on your host machine you add 192.168.122.1 (the default IP of your host in libvirt) as your first nameserver in /etc/resolv.conf, then you can do name resolution for your guests. dnsmasq is smart enough to use the other 'nameserver' entries in your /etc/resolv.conf for resolving non ...
